Dae Young Cheon (Hallym University, Republic of Korea)

Dr. Cheon has held several positions including Cardiology Fellow at Seoul National University Hospital, Clinical Assistant Professor at Dongtan Sacred Heart Hospital. He is currently an Assistant Professor at Dongtan Sacred Heart Hospital since 2023. His research focuses on cardiovascular diseases, heart failure, and the impact of lifestyle changes on chronic cardio-cerebrovascular diseases. Dr. Cheon has extensively researched the relationship between chronic cardio-cerebrovascular diseases and lifestyle factors, such as smoking habit change or exercise changes. He has extensive involvement in clinical research, contributing to numerous clinical trials and observational studies focusing on the efficacy and safety of cardiovascular treatments and interventions. Nowadays he is an active member of several professional organizations, including the Korean Society of Cardiology and so on.
