Andreas Zirlik (Medical University of Graz, Austria)

Professor Zirlik is Professor for Cardiology, Head of the University Heart Center Graz, and Chief of the Department of Cardiology at the LKH University Hospital and the Medical University of Graz, Austria. He practices interventional cardiology with a focus on percutaneous coronary as well as structural heart interventions of the tricuspid and mitral valve. His research interests focus on inflammatory mechanisms in atherogenesis and acute myocardial infarction as well as at the interface of cardiovascular and metabolic disease. He is the former president of the German Atherosclerosis Society (DGAF) and chairman of the working group of Heart and Diabetes of the German Cardiac Society (DGK). He is a current member of the managing board of the Austrian Society of Cardiology (ÖKG) and of various editorial boards including Cardiovascular Research, Atherosclerosis, PlosOne, and Case Reports in Cardiovascular Medicine.
