## **Eun Young Lee (The Catholic University of Korea, Republic of Korea)**

Dr. Eun Young Lee is an Associate Professor of the Catholic University of Korea. She received B.S. and Ph. D. degree in Internal Medicine (Endocrinology and Metabolism) from Yonsei University College of Medicine, Korea, in 2011 and 2014, respectively. From 2006 to 2014, she had worked as a clinician and research fellow at Yonsei University College of Medicine. In 2015, she joined the Catholic University of Korea as a faculty. From 2019 to 2022, she worked as a visiting scholar at Washington University in St. Louis, USA. Her main research interest is beta cell biology and the development of insulin-producing cells using an induced pluripotent stem cells. Recently, her basic research is focused on primary cilia, especially on beta cell function and differentiation. Along with beta cell biology, she is clinically interested in the treatment of diabetes and its complications.
