Jiyoung Kim (NUSEUM-LAB, Republic of Korea)

Dr. Jiyoung Kim is the Founder and CEO of NUSEUM, a pioneering company leveraging AI and big data for personalized nutrition. With over two decades of experience in nutrition, biochemistry, physiology, and pharmacology, Dr. Kim focuses on innovative healthcare solutions. She holds a Ph.D. in Toxicology from the University of Georgia and a BS in Food Technology from Korea University. Her career spans roles as a research professor at Seoul National University and as an entrepreneur refining healthcare technologies. Under her leadership, NUSEUM develops AI-driven platforms for personalized dietary recommendations, integrating with major e-commerce and delivery services to offer comprehensive health management solutions. Dr. Kim's work is marked by her dedication to bridging advanced research with practical health applications, making personalized nutrition accessible and effective for all. <https://www.linkedin.com/in/jiyoung-kim-34722517/>
