Ioanna Gouni-Berthold (University of Cologne, Germany)

Professor Ioanna Gouni-Berthold, is an Internist, Endocrinologist and Head of the Lipid Clinic and Lipid Research Clinic at the Center for Endocrinology, Diabetes and Preventive Medicine at the University of Cologne, Germany. Her major research interests focus on lipid disorders and cardiovascular prevention as well as on genetically determined dyslipidemias such as familial hypercholesterolemia, hyperlipoproteinemia(a) and familial chylomicronemia syndrome. The Lipid Clinic led by Prof Gouni-Berthold has led global patient recruitment in various cardiovascular endpoint trials with innovative lipid-lowering therapies.

Prof Gouni-Berthold is Vice-President and President-Elect of the German, Austrian and Swiss Society for the Prevention of Cardiovascular Diseases (dach-praevention.eu) and a Member of the Board of Directors of the International Atherosclerosis Society (IAS). Prof Gouni-Berthold serves on the Editorial Boards of several international journals and has received numerous awards.

She has published extensively in journals such as the *New England Journal of Medicine*, *The Lancet* and *JAMA*.

Her work has been cited in more than 9.700 publications.

Finally, Prof Gouni-Berthold contributes nationally and internationally to educational and training programs for clinicians in the diagnosis and management of atherogenic dyslipidemias.
